

Memorandum

TO: Service List – FY 2027 Capital Budget
FROM: Gas Commission Staff
DATE: February 20, 2026
RE: **Post-Hearing Questions (PH-1 through PH-3)**

Please see the below post-hearing questions relating to the proposed FY 2027 Capital Budget. **Responses are due by March 2, 2026.** Thank you for your cooperation.

PH-1 (To PGW) What is the status of pipeline replacement funding?

- How are emergency replacements due to leaks handled? Operating or Capital?
- Have we seen any trends in the last 5 years? More or less emergency replacements?
- How was this current winter's ice storm impacting leaks?

PH-2 (To PGW) Are there emissions reductions tied to the new liquefier?

PH-3 (To PGW) How much overall demand would have to be reduced in order offset the LNG expansion?

- Are there incentive programs to have customers reduce demand?
- Are there time of use rates? If not, what would it take to request from PUC?
 - Is this limited by new AMI meter rollout? What is that timeline?
